

## Where can I buy the lifting head for a water well drilling rig

How does a water well drilling rig work?

Water well drilling rigs employ different drilling methods, such as cable tool drilling and rotary drilling. In cable tool drilling, a heavy drill bit is repeatedly lifted and dropped to break through the ground. Rotary drilling, on the other hand, uses a rotating drill bit to cut through the soil and rock.

Does TMG make rotary drill heads?

TMG Manufactures a line of 4-speed gearbox drill heads for geotechnical, water well, micropile and rotary drill rigs. These rotary drilling heads can be adapted to almost all models of soil drilling machines, and feature a spring-loaded floating head, 4 speeds of drilling, and a built-in wet swivel system for drilling with mud or water.

What is a hydraulic water well drilling rig?

A hydraulic water well drilling rig is a kind of high-efficiency and multi-function drilling equipment that is mainly used for drilling wells, agricultural irrigation wells, ground source heat pump wells, and some other types of wells, especially suitable for water intake projects in mountainous areas and rock formations.

Do you offer spare parts for oilfield drilling rigs?

We can offer NON-OEM or OEM replacement spare parts for oilfield drilling rig equipment used on Oil & Gas or Geothermal Energy drilling rigs. This service includes sourcing, purchasing and delivery for the international end user.

What brands of drill rig parts do you carry?

We carry spare parts for top drill rig brands such as Diedrich, Atlas Copco, Geoprobe, CME, Acker, Mobile Drill, VersaDrill Canada, GtechDrill, and many others. We also offer drill rig tooling packages for direct push, geotechnical, hollow stem auger, core, and rotary drilling rigs, ensuring you get only the highest quality parts.

Which rig is best for water well drilling?

As a self-propelled core drilling rig, the XYX-3 trailer-mounted water well drilling machine in YG is another popular tractor-mounted drilling rig. The price of XYX-3 is a little high, but it's also more efficient and the drilling depth can reach 600m simultaneously. Therefore, it is more suitable for large drilling projects.
