The whole industrial chain from raw materials to end products. Founded on April 30, 1999, Changsha Heijiang industrial co., Ltd (brand name HJG Drill & BD Drill) is a famous privately operated enterprise specialized in researching and manufacturing rock drilling equipment and pneumatic tools.

What type of drilling rig is best suited for construction sites?

With that information available, it's easier to determine the type of drill that is best suited for the conditions. On construction sites, the top-hammer drilling method is typically used because these types of drilling rigs are smaller and more agile to go more places on uneven terrain.

Are rotary drills better than percussion drills?

Using a rotary drill can lead to a clean hole in rock structures, making them a preferred choice among rock and fossil collectors looking to excavate without causing excess damage to the geological layers. In contrast, percussion drills take a different approach by combining rotating motion with high-impact blows.

Are DTH drills better than top hammer drills?

Larger DTH drills are better suited for when the rock analysis identifies mud seams or other challenges with the rock being drilled. These drills deliver a straighter hole, can go deeper than top-hammer drills and are most suitable for hole diameters larger than 4 inches, with some exceptions.
