

Which supplier of screw parts for air compressor is regular

What are the components of a screw compressor?

The compressor primarily consists of the rotary screw air end, electric motor, air-oil separator, oil system, cooling system, air system, ancillary electrical control system and other components. The system flow diagram of the unit is shown in Figure 3-1. The typical internal structure of a LSV Series screw compressor is shown in Figure 3-2.

What is a screw air compressor?

As these screw air compressors are generally not equipped with any valves and have no mechanical forces that cause unbalance, these solutions can be extremely efficient for various applications. This is because a screw compressor works at a higher shaft speed and compresses a large volume of air with small exterior dimensions.

Should I buy genuine CompAir air compressor parts and spares?

For performance that doesn't falter and reliability that you can trust, only buy genuine CompAir air compressor parts and spares. Genuine parts are those that have been designed, manufactured, and engineered specifically for your compressor brand and model.

What are genuine compressor parts?

Genuine parts are those that have been designed, manufactured, and engineered specifically for your compressor brand and model. They are the only parts that will keep your system integrity intact and ensure your compressor performs as if it were new after each service intervention.

Why do you need OEM air compressor consumables?

They are the only parts that will keep your system integrity intact and ensure your compressor performs as if it were new after each service intervention. To maintain operational capability at the high standard you expect from CompAir air equipment, genuine OEM consumables are the smart choice.

What is a genuine replacement for a compressed air system?

Genuine replacements represent the best of engineering and professional quality. They are specifically developed to suit the operating parameters of the equipment they are designed for. Essential in upholding the standard of your compressed air network, genuine parts ensure smooth operation at optimal efficiency 24 hours a day, 7 days a week.
