What are the specifications for oil-injected rotary screw air compressors?

The document provides specifications for various models of oil-injected rotary screw air compressors, including: 1) Capacity and pressure ranges from 0.5-28.5 m³/min and 0.7-1.3 MPa depending on the model. 2) Motor power ranges from 5.5-220 kW. 3) Noise levels are generally between 65-75 dB (A).

What is a twin-screw compressor?

The twin-screw compressor is a positive displacement machine used for compressing air to moderate pressures. It comprises of a pair of intermeshing rotors with helical grooves machined on them, contained in a casing which fits closely around them. The rotors and casing are separated by very small clearances.

What is a screw air compressor?

Air compressor is modular in design, screw rotor, oil and gas separation extinguishers, coolers, are installed in a motor, within the framework of acoustic enclosures through the noise of rubber materials. Screw air compressor is the main components of screw head, the separation of oil and gas cylinder.

What is a screw compressor manual?

This manual covers the working principle and main structure of our screw compressor. In order to let the users make the best use of our products, we try to compressor. Read this manual before the installation and startup of the compressor. Contact our service department at any time if you need assistance. General Description

What is a screw-type air compressor?

Screw-type air compressor structure of a unique design, a compact, stylish appearance, high efficiency, small energy consumption, low noise characteristics and long life, is a smart environment-friendly products. Is widely applied in metallurgy, machinery, chemicals, and mining, and electric power industries of the ideal gas source equipment.

What are the components of screw air compressor?

Screw air compressor is the main components of screw head, the separation of oil and gas cylinder. Screw suction filter through the nose and suction inlet control valve, oil also inject compressed room, a cooling of the nose, while the screw and the bearings lubricated by compressed air pressure that is generated.

The SFC 15 20-hp rotary screw compressors is the perfect solution for smaller compressed air systems with varying air demand to achieve significant energy ...

Air Solutions Canada is Southern Ontario's air compressor expert. Sales, repair & 24/7 service for industrial compressors with a 94% first-time fix rate. Contact ...
