If you are looking for a water well contractor, please visit our page and contact them directly. Find qualified Water Well Service and Repair companies in your area using WellOwner.org's local contractor lookup.

What is a drilled well?

A drilled well consists of a hole bored (a borehole) into the ground, with the upper part or the entire depth of the well being lined with casing. Drilling is most typically conducted with a portable drilling machine brought to the site to construct the borehole.

How do you drill a water well?

Drilling is most typically conducted with a portable drilling machine brought to the site to construct the borehole. Various methods are used to advance the borehole to the necessary depth, and to remove formation material loosened and suspended by the drilling bit and fluid circulation or bailing system. Does water well drilling require a license?
